REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
    Output: Forward Playlist: a b c
    Backward Playlist: c b a
    Answer
    #include <stdio.h>
    #include <stdlib.h>
    struct Node {
   Char item;
      struct Node* next;
      struct Node* prev;
    }:
    // You are using GCC
    void insertAtEnd(struct Node** head, char item) {
      struct Node*newnode=(struct Node*)malloc(sizeof(struct Node));
      newnode->item=item:
      newnode->prev=NULL;
      newnode->next=NULL;
      if(*head==NULL){
}else{
        *head=newnode;
        struct Node*temp=*head;
```

```

    while(temp->next!=NULL){
      temp=temp->next;
    temp->next=newnode;
    newnode->prev=temp;
  }
void displayForward(struct Node* head) {
  //type your code here
  struct Node*temp=head;
while(temp!=NULL){
    printf("%c ",temp->item);
    temp=temp->next;
  printf("\n");
}
void displayBackward(struct Node* tail) {
  //type your code here
  struct Node*temp=tail;
  while(temp!=NULL){
    printf("%c ",temp->item);
                                              241501103
   temp=temp->prev;
void freePlaylist(struct Node* head) {
  //type your code here
  struct Node*temp;
  while(head!=NULL){
    temp=head;
    head=head->next;
    free(temp);
  }
}
                                              24/501/03
int main() {
struct Node* playlist = NULL;
  char item;
```
